We increase our awareness of the world around us while pursuing our ACADEMIC LIFE.

English

In English we apply our basic grammatical skills to creative work. We read recognized literature to analyze the ideas and styles of the great writers and in so doing we discover that there is more to reading than just following a plot.

Our foreign language teachers instruct us not only to comprehend, speak, and write the language of a country, but also to study its culture and history. We discover the thrill of speaking and thinking in a foreign language.

Foreign Languages

Mathematics

Through mathematics we become logical thinkers. Our minds absorb the arithmetic of the business and scientific worlds as they come in contact with everything from simple addition to sines and cosines.

1962 291) 570942

Science

In science we come to understand our environment and how we are related to the world. We begin to question the unexplained and use the laboratory method to explain it.

Social Studies

In Social Studies we study the advance of civilization and learn how the present is a continuation of the past. We study the problems of history in order to prevent their recurrence in the future.

Business Education

The Business Education courses prepare us for jobs in the commercial world. We learn such skills as shorthand, accounting, and typing. We acquire a confidence in our own abilities.

Practical Arts

Through practical arts we learn the skills of working with our hands. Home economics teaches us sewing, cooking, and interior decorating. Industrial arts teaches us how to operate machines and use them in constructive work.

Speech

Electives help us to develop specialized skills that will be useful to us in later life. One elective, speech, develops our presentation in public-speaking and improves our diction in regular conversation. We learn to be lucid and keen in debating.

Mechanical Drawing

Another elective, mechanical drawing, teaches us the importance of accurate design. In this two year course, we progress from making simple drawings to more complicated blueprints.

Music

Our music teacher reveals to us the great music and musicians that have enriched our civilization. We also learn the basics of music composition. As band members we patiently develop our talents and experience the pleasures of working in unison.

Fine Arts

In fine arts we practice our artistic skills. We sharpen our eyes to appreciate the beautiful and reflect it in our work.

Physical Education

In physical education we improve our physical agility and discover the spirit of competition and team cooperation.

Each year in June when the students notice some of their friends becoming more amiable and gregarious, they realize that it is the time for the annual class elections. Music Groups

We are proud of our music groups.

The Chorale, made up of carefully auditioned members, provides many entertaining concerts for the school and community. About half of its members were chosen for the District Chorus.

The other choral groups exhibit the same musical qualities which grace the Chorale. Only the Girls' Choir members are auditioned, the other group members are recruited through the elective program.

All excellent musicians, the Dance Band students have added a lift to our dances and brightened the intermissions of our plays and shows.

Marching with precision down the field, the Band resembles a professional group. It provides color and enthusiasm at our football games.

Senior Play

Several weeks of preparation were climaxed November 17 and 18 in the presentation of the popular comedy *Father of the Bride* by the Senior Class. Besides giving aspiring young dramatists an opportunity to act by the use of double-casting, and seniors a chance to show their organizational ability backstage, the play provided lots of fun with parties and new friendships.

Hamburger-crazy Birgitta hails from Sweden and lives here with the Suttons. She loves all American sports, especially football. Birgitta is an ardent gymnast, a good student, a proficient seamstress, and a mad skier. Because of her we feel a greater kinship with the young people of Scandinavia.

Foreign Exchange Students

Our public relations department is well represented by Jim, who was Wakefield High's foreign exchange student to the Philippines. Versatile and affable, he especially enjoys discussing politics and world affairs with anyone who is willing to listen. Through his lectures and our Exchange Student Assembly Program, we have been able to share his experiences in the Philippines.

Football

After an absence of two years, the prodigal Middlesex League trophy again found its home in Wakefield. The Warriors swept through their schedule with the best record in school history, bowing only to Saint Mary's in a non-league game. Led by Co-Captains Fred Hupprich and Rick Meade, the team brought the Holleran trophy to Wakefield by defeating Melrose on Thanksgiving Day. Those late summer workouts and the grueling after-school practices paid off in a championship team. Congratulations to an outstanding team and a fine coaching staff.

Cross Country

Wakefield High School's cross country team turned in an outstanding effort in copping the State Championship through hard work and sheer determination. Co-Captains Bob Martino and John Farrington were instrumental in leading the team to a 6-2 season record. A sport such as this normally does not receive a great deal of glory, but this year's team certainly earned theirs!

Basketball

This year's Hoopsters, who rank with Wakefield High School's best basketball teams, turned in an excellent season in spite of seemingly insurmountable adversities. Throughout the season the team was hampered by injuries and other difficulties which were overcome by sheer determination and the able leadership of Co-Captains George Boyd and Bob Encarnação.

Ample proof of the team's success can be shown by the hundreds turned away at the key games and the fact that the team was the first in Wakefield history to play in the famed Tech Tourney.

Hockey

Since there were few returning varsity lettermen, the Kirkmen, captained by Paul Butler, did not fare as well as in previous years. Lack of varsity experience did not daunt the team's spirit, and the influx of underclassmen points to a promising future.

GYM TEAM—First row: Coach Reen, F. Wood, D. Surette, R. Amiro, C. Pastorello, P. Abbott, J. Sava, C. Peterson, C. Johnson. Second row: J. Moynihan, R. Nesbitt, S. Maguire, A. Akell, K. McCauley, T. Strength, agility, and perserverance were key factors in the development of the Gym Team. Ably led by Coach Reen, the team promises to make a fine showing in the coming years.

INDOOR TRACK—First row: R. MacClellan, Co-Captain; D. Lapery, R. Dennis, R. Meade, R. Martino, K. McCauley, B. Bonney, Coach Squires. Second row: C. Cardillo, G. Cain, Co-Captain; G. Page, B. Indoor Track

The Indoor Track team under the driving leadership of Coach Squires and Co-Captains George Cain and Bob MacClellan made its presence felt by breezing through the Essex County League with a 7-0 record. The team's success in only its second year of competition should be admired, and all due credit should be given to the team.

Outdoor Track

The experience gained during the indoor track season proved invaluable during the outdoor track schedule. With skill on the field and speed on the track the team once again compiled a string of impressive victories.

Golf

The golf team, completely intact from the previous season, was able to make an impressive showing with each player turning in excellent scores, some near par.

Tennis

The tennis team, under the skillful direction of Coach Woodman, improved greatly because of the fall tennis tournament and a growing interest in the sport.

Baseball

The baseball team, spurred on by its returning varsity strength, rightly took its position as one of the best teams in the league. Strong hitting and tight fielding proved to be an effective combination in reversing the losing trend of the last few years.

When you graduate it's wonderful to have a telephone job waiting for you. You'll love the friendly new people you meet. And you'll like the excellent salary, the regular increases, the opportunities for advancement and the many additional benefits that make working for the Telephone Company so attractive to so many young people.

Telephone jobs are important ones. We have our own training program which you can enter without any previous job experience.

Why not come and see our employment interviewer soon . . . before you graduate. Ask the Guidance Counselor at your school to tell you when and where to apply.
